## Fine Entertainment

The memory of St. Patrick, one of the greatest saints in the Church calendar, and the patron saint of Ireland, was most enthusiastically remembered on Saint Patrick's night when an extremely fine entertainment was given in St. Michael's Hall by the members of the Church. The masses were loud and many, the only regret, being felt by all present, was that they could have listened with pleasure till midnight instead of only until 10.30 p.m.

The performers are to be most heartily congratulated on the very fine performance, indeed, many of them seem to have missed their real vocation in life, as some of the acting was perfect.

Foremost, among the many on the list, must be placed Mrs. L. Hamel who, as the widow, was very good and also as a promoter, singer and pianist, is to be sincerely congratulated.

The vocal solo, "An Irishman's Dream," was very tenderly and finely rendered by Mr. C. O'Neil; he is a gentleman well known to the audience and time will show he will have many extra songs to delight his audience when they call for encores, which they are sure to do. We hope to have the pleasure of listening to him hundreds of times, we will not grow tired.

The recitation, "Caleb's Comings," by Francis O'Halloran, was extremely cute and was well rendered, to the great pleasure of the audience.

The vocal duet, "A Little Bit of Heaven," sung by Herman and Fred Smith, was well sung and brought tender memories to every Irishman's heart, indeed to the hearts of all their hearers, it carried us all back to those dear lands across the sea.

A very spirited and historical address, "The Day We Celebrate," was given by our own town barrister and solicitor, Mr. E. McKenna, who portrayed the man who has written the complete history, life and works of this great St. Patrick whose memory will remain fresh and green as long as we have such earnest gentlemen as Mr. McKenna to uphold St. Patrick's Day.

"The Rose of No Man's Land," sung by our soldier lad in uniform, Mr. L. Enard, and the Misses Leary and Delaney in nurse's uniform, appealed to the hearts of all present, and would especially appeal to every soldier's heart and to the hearts of all true men with red blood in their veins; it made all feel they would like to have been there to help.

This followed a beautiful rendering of "Killarney, My Home O'er the Sea," given by the massed choir of St. Michael's Church. This was extremely good and all too soon ended; may we soon hear it again.

The farce, "Marriage Under Difficulties," was so well played and made so many laughs, that everyone was kept busy trying to take the crosses out of their faces and to sit properly on their chairs.

Mr. Moske, as the squire (recently elected to office), is a lion actor (he may not know it, but it is true), he played his part to the life, his acting was nearly perfect; he could have made a fortune on the stage in much less time than he has already taken in his own profession.

Miss T. O'Halloran as "The Blushing Bride," also acted her part extremely well and the "blushes" were plain enough for everyone to see.

Now, after speaking so highly of the ladies, just "mere man" must be gallant and stand on one side. We must state that the stage scenery was very prettily arranged with flags and shawls, and the music was excellent.

Then last, but by no means least, the Rev. Father McCoy gave some very humorous quotations, which brought an intensely interesting entertainment, all too soon, to a happy end.

The large audience, which packed the hall, then rose and lustily sang "God Save the King."

## Missionary Finds New Chinese Tribe

Spent Three Weeks Among Strangers

Deep in the wilds of Western China, where the foot of a white man never before had trod, according to the Rev. Dr. Joseph Beach, a Methodist missionary, lives a polyglot nation of about 300,000 to 400,000 persons.

Dr. Beach, who is president of the Western China Union University, at Chengtu in the province of Szechuan, maintained by five evangelical denominations of Britain, Canada and the United States, and who has just returned to New York to participate in the Methodist centenary, told of a journey he took alone, with a native guide last summer far into the depths of the habitat of the "t'ien, or children of the soil," the strangest people in the Orient.

The doctor passed three weeks among the twenty or more tribes in the land, which is as inaccessible as Tibet, he said, and while there found almost every type of mankind, including pygmies, men and women resembling negroes, Americans, Szechuan, East Indians, Gorkhas, South Sea Islanders, Europeans and other races apparently from all four quarters of the globe. These people, of course, he said, had never been anywhere else than in the country he found them, namely, in a region bounded on the north by the province of Kansu, the south by Burma, Yunnan and Kweichow, the east by Szechuan and the west by Tibet.

"I found a land of beautiful valleys covered with fine farms and home-lands," said the doctor, "and while I was there, I found a land of white towering above them were mountains from 6,000 to 18,000 feet high. The frontier of China was protected by queer looking, half-breed buildings, manned by natives armed with weapons resembling the old-fashioned blunderbuss. It was impossible that these people were the originators of gunpowder, for the Chinese, who for years have tried to rule them, admit it is of better quality than the powder they make themselves.

"Although suspicious and warlike, and hostile to some kinds of Chinese the 't'ien proved to be most hospitable and fed as well as clothed. Huge smokestacks in their communities gave them the appearance of thriving industrial cities. When we arrived we found the 't'ien were not solely for the purpose of drying and curing vegetables, meat and fish, which were suspended tier upon tier the entire height of the chimney.

"The architecture of the country was distinctly foreign to China, resembling in many respects the feudal castles of Normandy. In other respects it was not unlike the structures of Babylonia and Palestine. Grain, for instance, after being harvested, was thrashed upon the roofs of the houses, just as in the Holy Land.

The houses and towns were nothing more than boxes with one or two windows from which the doors and smoke of cooking escaped.

"On top of virtually all the fortified castles a flag was flown. It was said these were 'prayer flags' and had no special tribal or patriotic significance. Every man in the country, it was said, had a prayer flag.

parently, is a law unto himself. Each tribe has its chiefs, but there is no national head and China exercises only nominal sovereignty.

"Quards are vitified on horseback by means of blunderbusses, spears, bags of stones and bamboo clubs. The enemies challenge one another and a given signal dies, full tilt on a small, wiry pony, at each other. It is seldom that both combatants escape alive, but the survivor is required to feed and clothe the family of his dead adversary as long as they live and this makes duels rare. In many respects these combats resemble the tournaments of the Middle Ages."

Dr. Beach said that while he believed he had penetrated further into this section of Western China than any other white man, he regretted he had not gone still further.

"For my guide," he said, "I had four or five days' journey beyond there were tribesmen near Sungan who are just like you," he said. That is, natives who appeared like Europeans. Their dress, conversation and habits of thought, he said, was characteristic of the country.

"How so many different types of people located there is a problem for the ethnologist," resumed Dr. Beach. "One theory is that they represent all the warring tribes of the world that have come into the region of Asia and, driven by the Mongols and Tartars, made their last stand in this natural range between India, China and the northern part of Asia."

"Each tribe is independent of the other, all speak a patois of Tibetan and Tibetan and their religion seems to be animistic or that of the Lamas. The most numerous are the Lolos, who again are subdivided into smaller tribes. Others are the Miao, who are polyandrous or polygamous. These people, I believe, are responsive to Christian influence and kind training, and 1,500 missionaries would bring to them the enlightenment they so much need. Nothing has ever been done for them by civilization."

**Telephone Users Increasing**  
Each of the Three Prairie Provinces Has An Excellent Telephone

The fast increasing number of rural telephone users is a good indication of the development of a district. Each of the three prairie provinces has an excellent telephone system, and as far as the life means of communication is concerned the farmer in Western Canada is as well provided as the farmer in the Orient.

With 39,438 miles of pole line in operation, no less than 41,999 rural subscribers were served by the government rural telephone system at the end of the fiscal year, April 30, 1918. At the end of that period there were 918 rural telephone companies operating under the provisions of the act. During the present fiscal year to date 4,925 miles of new line have been added, making a total of 44,363 miles of line in operation at the present time.

**German Barred by Grain Growers**  
Regina, Sask. — The German language will be used no longer in the House of Commons of the Saskatchewan Grain Growers' association according to the announcement of J. A. Munro, secretary of the association.

The annual convention this question was raised and led to the executive to deal with as the members of the board heard that French and English will be the only languages used in future, unless the federal government finds it wise and safe to permit the use of other languages.

**New Roads for Manitoba**  
More than 1,000 miles of good roads, involving an expenditure of two and a half million dollars, may be constructed in Manitoba during the coming summer. Plans for this work have been prepared and will come before the provincial government for ratification at the forthcoming session of parliament. At the present time there are about 5,500 miles of roads in the province; 500 miles of gravelled, and 5,000 carter embankments.

**Canada's Potato Crop**  
Last year 105,679 bushels of potatoes were grown in Canada, valued at \$2,340,000, according to the Dominion Bureau of Statistics.

Northumberland Miner's Association has sent a cheque for \$10,000 to the Canadian Red Cross Society for the benefit of distressed miners in Belgium and the families. Earlier in the war the union raised \$50,000 for suffering Belgian underground miners.

## Co-Operative Creameries

Strong Organization Promotes Dairy Industry in Saskatchewan

Strong co-operative organization has been a characteristic feature in the development of the dairy industry in Saskatchewan, and this movement is steadily gaining impetus. The co-operative creameries of the province were in the year 1917 amalgamated into one company known as the Saskatchewan Co-operative Creamery Company, Limited, and the company was given wide powers for the development of dairying and its natural adjuncts, the cold storage and poultry industries.

This organization during 1918, in addition to manufacturing more than 2,800,000 pounds of butter, also provided a cash market for farmers all over the province for both eggs and poultry. Nineteen-eighths was the total production of these latter branches were taken up, but 5,780 cases or 173,500 dozens of eggs were handled, and through the poultry marketing stations only operated about eight or ten weeks during the autumn and early winter, the birds received showed a total dressed weight of 113,947 pounds. The Saskatchewan Co-operative Creameries, Limited, now for the third year, is in full operation, and a fourth one under construction, while plans have been prepared for another one on which construction will be commenced as soon as spring opens. In addition new creameries will be erected in many parts of the province.

Statistics show that approximately seventy-three per cent, of the population of Saskatchewan is on the land, consequently with a large and rapidly increasing dairy output the question of outside markets is essential. In this respect the men in charge of the work have built wisely. From the organization of the province the importance of quality in the finished product has always been kept well to the fore, with the result that a splendid outside market has been built up. The importance of this export trade is shown in the fact that since the outbreak of the war, the export of carloads of butter were shipped out of the province during the past year, there had a market value of approximately \$1,210,000. The average per pound sold several cents higher than in 1917 and the total increase in value of creamery exports was \$380,000. All indications point to a further substantial increase during the present year in the quality and quantity of butter shipments, and the value in dollars and cents may prove to be.

**Manitoba Headquarters R.N.W.M.P.**

Manitoba will also have a reserve squadron of the mounted police, which will be located where this body will be located.

The reserve squadron for Saskatchewan will be at Regina, which will also be provincial and general headquarters. The Regina superintendent has not yet been named.

**Duluth Construction**  
Work goes on apace in Duluth for this season's money to go into several millions of dollars in value, and will be completed in an array of new buildings. The list includes a federal building to cost \$1,000,000; new city hall estimated to cost \$1,000,000, and three schools to involve a total of \$250,000. Schools and other public building projects already announced for the range towns will also entail heavy expenditure and will assure activity in all branches of the building trade up till the close of the season.

**Hunger Cures of German Strikes**  
Washington. — Strike outbreaks in Berlin have been due, primarily, to lack of food and not to communist or Bolshevik propaganda, according to advice to state department from Copenhagen, reporting conditions in Germany as witnessed by an official. Published reports as to the bloodshed in Berlin, according to these reports, have been greatly exaggerated.

## Construction Notes

Medicine Hat contractors report prospects for work in the building trade looking exceptionally good for this spring. The work of remodeling the interior of W. Foster's residence, including an additional room, has just been finished, and contract for rebuilding the foundry at Martin & Phillips' plant, recently badly damaged by fire has been awarded.

The Saskatoon Red Triangle project to build a hut for the accommodation of returned soldiers, and a depot of the fund appeared before the city council, March 3, asking for a loan for the building, which is to cost \$17,000. After discussion of the city council decided to give the third necessary for the purpose at the corner of Twenty-first street and Grand avenue.

The British Columbia university is asking the provincial government for \$100,000, so as to immediately proceed with the erection of buildings on the Point Grey site.

The Imperial Oil Co. will make large additions to their Medicine Hat branch this year. They now have plans drawn for five different buildings, all to be built this spring and summer, the approximate cost of which will be \$200,000.

More than \$300,000, including fittings, will be involved in the building of an addition to the Hudson's Bay company's store at Nelson, B.C.

Building activity in Regina is gradually regaining its pre-war condition, according to the amount of the building permits issued in February. The total amount of the permits for the month is \$37,300, which is by far the highest for the same period during the last five years.

There is considerable building activity in the erection of residences this year, and several of the permits issued the past month are for houses, or for alterations to buildings, to make them suitable for residences.

Among the first of the public works to be undertaken this year by the Saskatchewan government will be new headquarters for the provincial police, which will be erected on the site of the old telephone office in Regina. The provincial architect's office is now busy engaged on the plans and specifications for a number of public buildings and will assuredly be in the estimates, on which work will begin as soon as possible this spring. # Freedom Sought By the Koreans

Seoul. — The declaration of Korea's independence says it represents the voice of twenty million people speaking in the name of justice and humanity.

"We are no mean people," the declaration continues. "We have 43 centuries of history as a distinct self-governing nation. It is our solemn duty to secure the right of free and perpetual development of our own national character, adapting ourselves to the principles of the reconstruction of the world."

"It is nearly two years since, for the first time in our history, we put on the yoke of another nation and were made the victim of the curse of the most imperialistic system in the world."

The declaration continues that it is the duty of Koreans to secure their independence, wipe out injuries, get rid of serious sufferings and "sit up the national spirit and vitality so as to express by the unjust regime of Japan, and leave our children eternal freedom, instead of a bitter and abominable inheritance. We shall fight to the last drop of blood in the cause of liberty."

## Plan Has Failed

France Gives Up Idea of Pooling War Debts

Paris. — France has abandoned, for the present at least, any hope of having her great war debts shared by the allies. It is authoritatively asserted by one of the Americans attending the conference that what had been an embarrassing possibility, now has been definitely eliminated from the deliberations, although it is possible that France might at some future time attempt to secure assistance.

The project has never been formally presented at the conference but conversations held at intervals since the conference began have served as a medium for the presentation of the French point of view.

The British and United States delegations have been quite frank in their disputes, and have openly said the people of their countries would be slow to endorse such a plan.

## Decisions Becoming Known

Military Conditions For Germans Given Out In Installments

London. — The personnel of the German fleet is to be restricted to fifteen thousand, the supreme council has decided, according to press dispatches from Paris.

The military conditions to be imposed on Germany includes guarantee that no tanks will be built and no more poison gas manufactured and that all German war material must be handed over and destroyed.

It is added that the commission will supervise the carrying out of these conditions.

When the Germans are summoned to Paris, the Evening News says, the treaty will be read to them and they will be invited to sign it. There will be no discussion with a view to alterations of the principal articles of the treaty. If it is thought necessary, questions involving the adjustment of details will be referred to a special commission.

German Delegates Go To Brussels. Copenhagen. — The German delegates are going to Brussels to learn the decision of the allies concerning the turning over of the German merchant fleet and the conditions of the cable treaty that is to be given Germany in return.

Weimar. — Under secretary Brand, speaking of the armistice negotiations at Spa, said:

"We consider the rupture of the Spa meetings simply a measure permitting the opposition delegates to demand fresh instructions from their governments. Our situation is serious, not desperate. Fresh negotiations will come."

# Hun Delegates Must Stay at Versailles

Paris. — When the time for the signing of peace arrives, it is understood Germany's representatives will be housed in one of the palaces at Versailles and will not be permitted to enter Paris, as the French government does not care to undertake to afford protection to Germans in Paris.

## Indemnity Bills Presented

Amounts Claimed Cannot Yet Be Made Public

Paris. — All the belligerent nations have presented their bills for indemnity to the commission, except France.

The amounts claimed by the various nations from Germany cannot yet be made public, the commission reserving to itself the right to give out the figures. It can be stated, however, that Belgium's demand totals between thirty billion and forty billion francs—twenty billion francs for actual physical destruction and the balance for thefts, unpaid-for requisitions, seizures and the like. This is the largest figure claimed by any of the belligerents with the exception of France.

## British Army of Occupation

London. — The government announced in the house of commons that the total strength of effective and non-effective British troops in the armies of occupation in all theatres of war amounted to 302,000 men, including officers. The strength of the British army in France, Belgium and Germany, including Dominion troops, on February 1, was 138,816. It was stated that 19,700 German prisoners are being fed by the British committee department.

## Oriental Start Run on Bank

Police Reserves Were Called to Handle Crowds

Vancouver. — A scene closely resembling one of the panicky days during hard times was enacted here when a run was started on a Japanese bank in which Hindus as well as Orientals and shortly after the noon hour, a wildly dishevelled mob made its way into the bank in an automobile, presented their deposit books and demanded their savings.

From this incident rumors spread until there was a great crowd of Orientals demanding their money. Police reserves were called in to quell what had the appearance of a riot. Constable Usher was reported to and in a short time two automobiles of crisp bills were on their way to the bank from another bank and were soon arrayed in plain sight. Constable Usher addressed the crowd and many of them reduplicated their money before leaving the bank. The greatest number of withdrawals, however, were made by Hindus, who took their bills away from there. Several Hindu mills were early crippled for help during the afternoon when their Asiatic employees made a wild dash for the bank.

# Labor Troubles Now In Ireland

## Reels Plunder City

London. — A Copenhagen dispatch says that the nature of the fighting between government troops and Spartan bands in the eastern suburbs of Berlin seems to indicate that local Spartan groups have been formed for "no other purpose than to plunder the city." An Amsterdam message says that a Spartan adherent was captured in his possession were found jewels valued at 800,000 marks. The message adds that the man was executed.

## Eight Hour Day for Spanish

Madrid. — The Spanish cabinet decided to grant an eight-hour working day to the building trades throughout Spain, wages to be fixed by committees of employers and workers in each district. The cabinet also approved a bill to insure workers against unemployment.

London. — Especial prominence is given by the Mail to a Dublin dispatch representing the situation in Ireland as being extremely bad and maintaining that the need of effective self-government is more urgent than ever before.

"Now that the Sinn Fein members of the house of commons have been released," the dispatch says, "there will be a new assembly of the Irish parliament which will probably be a very troublesome affair without an authoritative administration to balance its activities. Labor troubles of greatest import are growing, and it is impossible for the British government to handle them. There is hardly a section of Irish labor which is not preparing or threatening to strike or demands which no employer can possibly grant."

"The well intentioned schemes of General Viscount French, lord-lieutenant for the Dublin province, have gone by the board, and there is a dangerous situation which can be handled only by an Irish parliament."

## Assassination Was Deliberate Plot

Vienna Court Wished to Get Rid of Archduke Ferdinand

Berlin. — Charges that the assassination of Archduke Francis Ferdinand and his wife, the Duchess of Hohenberg at Sarajevo on June 28, 1914, was the result of a deliberate plot by the late Count Tizsa, former Hungarian premier, are made in a pamphlet written by a priest who was the spiritual adviser of the Duchess of Hohenberg, according to a Vienna dispatch to the Frankfort Gazette. The pamphlet entitled "The Sarajevo Murder and Count Tizsa's Responsibility for the World War," is said to have made a profound impression in Austria.

It is declared that Francis Ferdinand repeatedly refused to go to Sarajevo and it was only an appeal to his courage that induced him to make the trip.

"The most elementary precautions were omitted," it is stated by the priest. "He was simply led into a trap prepared by the court at Vienna and the Hungarian aristocracy, headed by Count Tizsa."

The general idea of the pamphlet is that Magyar magnates with the consent of the Vienna court wished to get rid of the archduke, who was extremely disliked, and obtain vengeance for the murder of the prince of the Duke-Jugo-Slav, who had been made his ally. It is pointed out that no "proper" enemy was ever made into the tragedy, and that no one was made responsible for the fact that precautionary measures were not taken.

## North Pole Route Proved a Failure

Explorer and Men Landed Near Starting Point

Dawson. — Storker Storkerson, explorer, and his few men who landed on an Arctic ice floe last year, expecting to float toward Siberia, have landed near the mouth of the Colville river, Alaska, not far from Baker's Land, where they started, according to word brought here by the Royal North West Mounted Police. The party established a camp in March, 1918, on an ice floe, thirty miles long, seven miles wide and from fifty to one hundred feet thick. On this they drifted one hundred miles west, seventy miles north, and crossed the Arctic circle. They landed November 7, 1918. While on the ice they subsisted on polar bears and seals.

Storkerson is reported to be on his way to Ottawa.

# Geneva Suggested as Capital for League

Paris. — An invitation was sent out to all the neutral nations in Europe, Asia and South America, asking them to attend a private and unofficial conference on Thursday, March 20, with the object of giving neutral nations an opportunity to present their views on the league of nations. The invitation was sent by the conference authorities to the ministers of the neutral powers in Paris, and they forwarded it to their governments.

Switzerland has already replied favorably to the suggestion. No South American governments have yet answered.

A strong sentiment is developing in high quarters of the conference towards making Geneva the official seat of the league of nations. Several of the heads of the delegations, who have been consulted, have given their approval.

## The Power of a Ten Dollar Bill

Consider the power of a Ten Dollar Bill when it is spent at home. It is like magic. It circulates. It pays off your obligations. It gives people to work in our community. But the ten dollar bill that is sent away from the out-of-town house does nothing for our town. It becomes dead to us. It is out of commission forever as far as our town is concerned. We never see it again. Let us, then, give power to the money we spend. Let us remember that our best investment is that power-money that we spend at home.

## People to Decide

Government of Alsace Lorraine to Inhabitants

Strasbourg. — A council of Alsace-Lorraine at a meeting here has adopted a plan for the re-organization of the administration of the two provinces, according to the wish of the inhabitants. A French high commissioner, with headquarters in Strasbourg, will centralize all French services under his authority and will act for the French minister of war in matters which now have to be referred to Paris.

A number of members of the council are charged with the duty of recommending to the commissioner as a permanent consultative commission. The council adopted a resolution insisting upon the necessity of hastening the elimination of all German elements from the public service.

## Is Ex-Czar Dead?

New York. — Bernard Nussbaum, a lawyer, was named by Supreme Court Justice Brandeis to Brooklyn as a committee of one to ascertain whether Nicholas Romanoff, former czar of Russia, is dead or alive, and if dead, who is next of kin.

Mr. Nussbaum is eagerly looking for someone who can solve the riddle for him, for on his solution rests the collectability or non collectability of a \$117,450 judgment which Mr. Nussbaum recently secured from the Supreme Court on behalf of the Marine Transportation Service Corporation.

## Boundary Dispute Settled

Will Restore Belgium's Sovereignty and Eliminate Her Neutrality

Paris. — The report of the commission on Belgian affairs, charged with investigation of the differences between Belgium and Holland, has been submitted to the council of the five great powers. It advises that the peace treaty of 1839 establishing the status of Belgium and Holland be revised by the council as they now are "useless and disadvantageous to Belgium."

The three treaties are identical except as to the signatories. Belgium and Holland signed one and Holland and Belgium each signed one with Great Britain, France, Austria, Russia and Prussia. Three of these powers have disappeared and the treaties have become "scraps of paper," which Germany violated by invading Belgium.

The proposed revision of the treaties will restore Belgium's complete sovereignty and eliminate her neutrality, which afforded no protection and is now disastrous. Holland will be dismissed before "the big five" shortly to discuss revision of the treaties.

## Great Waterway Across Europe

Chateau-Sur-Saône, France. — A session held here approved the project to join the Rhone river with the Rhine by coupling up the Rhone with Saône. The purpose is to create a great waterway between the Mediterranean sea and central Europe.

the scene, with its immense variety of

our, although its verandage was offset  
by the red, blue, yellow and pink that  
mingled with it. Prizes were offered  
for best costumes and were awarded

**Overland**  
MADE IN U.S.A.

"Well Built"

The admiration for the Overland is due not only  
to its sturdy and graceful appearance but to its  
utility as well. Overland success is largely due to  
the fact that Overland owners have not only bought  
Overlands themselves but have enthusiastically  
recommended them to their friends.
